GRAPHICAL REPRESENTATION

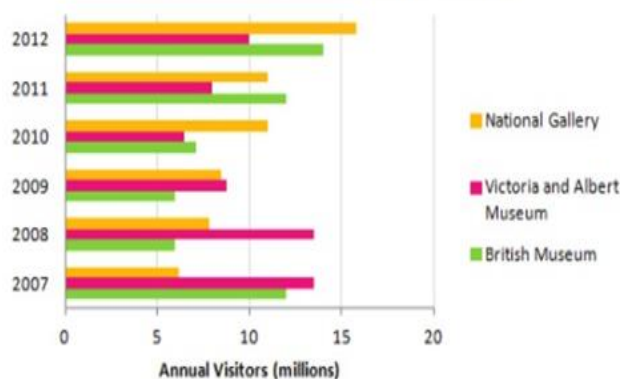

You should spend about 20 minutes on this task.

The bar chart shows the number of visitors to three London Museums between 2007 and 2012.

Summarize the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Museum Visitor Numbers, 2007-2012

- The bar chart illustrates how many individuals visited three various museums in London over the 5 years period from 2007 to 2012.
- The National Gallery had an increasing trend, whereas Victoria and Albert's museum decreased throughout the period.
- As observed from the graph, in 2007, the National gallery had just 6 million visitors. However this number rose to over 15 million after five years, and this was the highest number of annual visitors than other museums.
- In 2010 and 2011, the number of people who visited the National Gallery was almost 11 million.
- Almost 12 million individuals visited British museums in 2007.
- This count drastically decreased to 6 million in 2008 and had the same visitors after a year 2008.
- This number gradually increased up to 7 million visitors during 2010.
- This number suddenly went up after 2009 every year and settled to 14 million in 2012
- With regard to Victoria and Albert Museum, the number of individual people who visited Victoria and Albert Museum was same for the first two years 2008 & 2007 which is around 13 million.
- In 2009, the number of individuals visiting the Victoria and Albert Museum dropped to 8 million.
- Although there was a growing trend after 2009, the individual visitors were less than other museums in the last three years.
